### **Statement of Reasons**

The proposal is to improve road safety by reducing the volume of traffic in streets which are narrow, are often without footways and which generate significant pedestrian flows, while allowing access to parking spaces for those who require it in the evening. It will improve the character and amenity of the local area and make the town centre more attractive for pedestrians, cyclists and particularly the older and younger road users. It will reduce traffic congestion and potentially improve air quality and the character of the environment.

In addition, it is proposed to make adjustments to update descriptions to ensure measurements in the traffic order correspond with existing on street markings. Specific details of what is proposed at each location can be found within the deposit documents
